MONEY => Source = Course

The Source of money always impacts the Course of action by the recipient of that money!

Over 90% of campaign donations for some Utah races are received from special interest PACs outside of Utah!

As a biologist I sometimes study plants.

Some plants extend their roots great distances to reach sources of water.

Tracers placed in a water source can identify which plants are accessing that water source.

Politicians often extend their reach to distant places in search of money.

The bills passed by Senators and Representatives similarly show the source of their funding.

A candidate receiving campaign donations from throughout Utah will listen to and respond to constituents throughout Utah!
